Construction process

Duration of the project (design and construction): 13 months

Construction costs
(without building renovation): 1.6 million EUR

Type of tender and award: Public invitation to tender, allocation in 4 construction jobs

Commissioning: 29th July 2006

Data

Year of construction: 1954

Renovation: 2005/06

Dimensioning: for a daily number of approx. 1,000 swimmers

Total water surface: 1,881 m²

- Paddling pool
- Non-swimmers' pool
- Swimmers' pool
- Treatment system: Constructed wetland (reed):
4 individual basins (total surface: 2,000 m²)
Plants: Phragmites communis (reed)

The water treatment plant is dimensioned for an average number of 1,186 swimmers. It works without any chlorine/chlorine dioxide.
